

Brand-Rex Copper Connectivity – Cat6Plus Tool-free Jack
 Category 6 Shielded Tool-free Snap-in-Jack

PRODUCT DESCRIPTION:

The Cat6Plus Shielded Tool-free Snap-in-Jack is easy and quick to install, its compact construction and multiple cable-entry options make it the most flexible product of its type available. It is smaller and shorter than traditional products, allowing it to fit more comfortably into confined spaces. The jack also features an adjustable management element allowing for a rear, top or side-entry cable termination.

Designed for use in all structured cabling environments including the general office and data centres, the jack can be installed in patch panels, wall outlets and floor box modules to provide a robust and versatile solution.

The Cat6Plus system is a Category 6 and Class E solution set that is fully backwards compatible to Cat5e (Class D) products. The jack is fully compatible with all our UK and Continental style faceplates and patch panel products

PRODUCT CHARACTERISTICS:

- Outlet Style: Shielded keystone type with unkeyed RJ-45 ports
- Cable Entry: Rear
- Hole Plate Thickness: TBC
- Body Material: Zinc
- Jack Contacts: Nickel and gold plated phosphor bronze
- Plating: TBC
- Punch Down Blocks: Tool-free with push down cable manager for wire AWG 22-27 solid and stranded
- Wire Terminations: Tool-Free with cap
